

MANTA RAY and STINGRAY anchors now available with double corrosion protection (DCP)

MANTA RAY and STINGRAY anchors are now available with Fusion Bonded Epoxy Coating over the normal hot dip galvanized finish thus providing Double Corrosion Protection. A prototype was tested by driving it with a mounted pavement breaker in abrasive soil and then retrieving it. It was subsequently tested in Foresight's severe Drive Simulator Fixture. The testing revealed minimal damage to the epoxy coating. These anchors have been successfully used on a pipeline-anchoring project in the San Francisco Bay area where corrosion protection was a concern. Triple corrosion protection could be achieved by grouting the DCP anchors during installation.

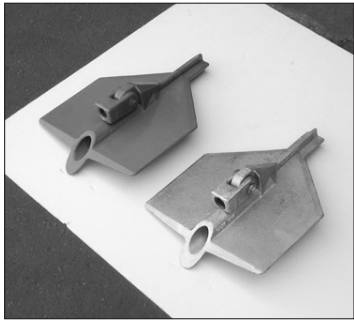

Available models are:

For Guy line applications;

- MR-SR-32G-DCP
- MR-1-32G-DCP
- MR-2-32G-DCP
- SAR-10A-DCP 1" x 7' utility style anchor rod
- SAR-10A-DCP 1" x 3 1/2' utility style anchor rod
- C-1-DCP 1" coupling nut
- EN-32-DCP eye nut
- TE-IT-DCP utility style triple eye nut
- TE-IT-DCP utility style double eye nut
- TE-IT-DCP utility style single eye nut

For Civil Construction applications;

- MR-SR-CTB-DCP
- MR-1-CTB-DCP
- MR-2-CTB-DCP
- CTB-10-DCP 3/4" x 10' Continuous thread bar
- CTB-C-DCP Hardened washer
- CTB-C-DCP Beveled washer
- CTB-N-DCP Hex nut
- CTB-P-DCP 6" x 6" x 3/8" steel plate

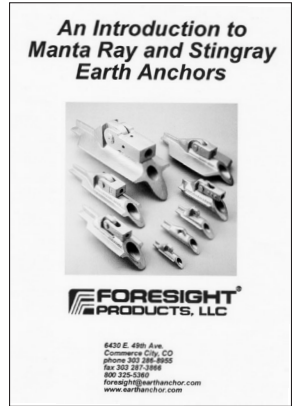

For STINGRAY applications;

- SR1-SCR
- SR3-SCR
- SCR10
- SCR
- SCR-HW
- SCR-BW
- SCR-N
- SCR-EN
- SCR-P

New Introductory Document about MANTA RAY and STINGRAY anchors

A new document titled "Introduction to MANTA RAY and STINGRAY Anchors" is now available from Foresight. Designed as a brief and concise overview of our anchors for engineers and specifics in the Civil Engineering and Construction market, it includes sections on installation methods and equipment, technical performance issues, and a generic specification for use of MANTA RAY and STINGRAY anchors for tiebacks. It is available electronically, as well as paper back.
